Industrial Visit at TATA Consultancy Services

7th April 2017

The very first industrial visit of IIIT Nagpur was carried out at TATA consultancy services on April 7th, 2017. The main objective of the visit was to make the students aware of the technologies being used in current market and how it is managed in the big industries which connects its different clients from all over the world to their services, also to have a discussion on “trends and technologies at TCS and trends in the IT industry in general”. We had interactive session on TCS’s expectations from students and competency development for campus selection.

The CSE and ECE batch gathered at the head office of TCS Nagpur at Mihan at around 10 am . After the procedural security check we were guided towards the induction room to brief us about TCS and the trends and technology at TCS/IT industries.

We were guided by Mr. arvind kumar through the first half of the visit and got to know about how the company was formed and the success stories of its branching out to different cities. The students posed different question about the working and the teams that work together to keep the company at the high power, also questions were asked on the technology being used by the big companies. Mr. arvind kumar very enthusiastically gave us the knowledge we were seeking.

He told us their greatest asset is the talent they get from their employees and also their brand and their values. He gave us insides on the things that the students could do to improve themselves and help them through their campus selections.

The company follows the principle of “smart technology plans do more than enable new processes, they enhance business results”. Recognizing their responsibility towards their people, Tata consultancy services passionately strives to attain progress and development of society through its operational activities. Mr. Arvind also made us aware of the strategies followed by the company.

Then the students were taken to the cafeteria for lunch where they got to associate with the employees of the company. Who were very cheerfully interacting and making them comfortable in the professional environment .Students were very much inspired by the working of the company and overjoyed to have connected with the determined and hardworking employees of the company.

After the splendid lunch the students were directed back to the induction room for the next event of the day that was the interesting session on “Big data and analytics” technology that is presently used by the company. The topic was introduced to the students by Mr.sharandhar Sharma, he gave the students the example of most used websites such as face book and twitter to explain how there are different types of analytics and how these can be performed through different applications available in today’s world. And then he went on to explain how the company uses these big data and the analytics that they perform.

The students were inspired and have got real feel of company’s working after this visit. They got a chance to see the transfer of their theoretical knowledge to practical implication. This will even help students to understand subject matter clearly in future also.
