

The British Council has launched a scholarship programme **British Council Scholarships for Women in STEM** in partnership with UK universities aimed at benefiting women from South Asia.

A range of programmes in STEM subjects are being offered by 8 UK Universities to women from India, Bangladesh, Pakistan, Sri Lanka, Nepal and Afghanistan.

The scholarship is to study a master's degree in science, technology, engineering and mathematics (STEM), by women who can demonstrate their need for financial support and who wish to inspire future generations of women to pursue careers in STEM.

Interested applicants are expected to apply to the UK University directly in the programme of their choice by end of March 2021 for their course.

To see the exact deadlines, course details, eligibility criteria and other details of the scholarships, applicants are requested to visit the website and the website of the university they are applying to.

The information on the scholarships programme and application process is available at <https://www.britishcouncil.org/study-work-abroad/in-uk/scholarship-women-stem>.

The interested students may take advantage of the above scholarship launched by the British Council.
